

Chimney Repairs

Does your chimney look like this?

A deteriorated chimney can allow moisture to penetrate possibly causing costly repairs to the interior of your home.

Have your chimney repaired to ensure you have a safe working chimney to get the best use of your fireplace this winter.

DPM prides itself on quality work that's done right and customer satisfaction.

From design to completion the customers' thoughts, ideas, concerns and revisions are addressed.

Quality products are used to ensure you get the best result for your investment.

Stone Window Wells

Stone window wells are a very nice addition to the overall look of a window. They add character to your home while still allowing as much light as possible to enter. Choose from several colors to match the exterior of your home.

Decorative Parging

Parging helps to protect your foundation wall from moisture and gives it a cleaner looking finish. It can be a basic smooth application of a cement-based product or something a little more decorative. There are several techniques and styles to choose from. Pick one that suits your home or your own personal preference.

Retaining Walls

Retaining walls can be used to hold back soil to level your property or be used as a decorative dividing line in place of a fence. Installed on the sides of your driveway they can provide a great flower bed or edging.

Front Entrance and Walkways

How long have you waited to enhance your front entrance with a beautiful walkway or stone stairs? Your home's curb appeal would be pleasantly changed, thus increasing its value as well. Maybe you've told yourself for years that one day you would. Why wait any longer? Make it a reality and watch the compliments come your way from family, neighbours and friends.

Back Patio

Finally get the back patio you would be proud to entertain on. Extend your home's living space to your backyard. Put your patio table and chairs in a space designated just for them. Set up the barbeque. Have those parties and get-togethers on a surface free of tree roots and clumps of grass. Enjoy your backyard as you intended it to be used. At the end of the day sit back and relax and enjoy a sharp, crisp, well designed outdoor living space.
